1955-2015

**SAGOLA** ®

SAGOLA can trace its origins to the year 1955 and is fruit of the pioneering spirit of its founder, Alejandro Sánchez Larrauri. It began as a small subcontracting workshop for industry. After some years in the subcontracting sector, Larrauri felt the need to manufacture his own product and progressively withdraw from subcontracted activity.

The chosen product was the spray gun. This new era for SAGOLA was crowned by the manufacture and sale of the mythical ALM 401 spray gun. From that very moment SAGOLA began to make and distribute a large number of spray gun models and other complements used in the coatings sector such as air filters, pressure pots, and an endless list of equipment for the most varied applications.

Due once again to the entrepreneurial spirit of the SAGOLA team, the need was felt to open the company to the international market. For that reason the Company began operating in related markets such as Latin America, where it soon became the indisputable leader, later expanding to Arab countries, Asia and finally Europe. Today, SAGOLA is present in more than 80 countries worldwide.

SAGOLA has maintained the highest quality standards in the manufacture of its products from its very beginnings, which has contributed to become a very important competitor in sectors such as bodyshop and industry. Products range from a simple spray gun to complex CNC coating machines.

Today, after 60 years, SAGOLA is still a 100% family company, a vital reason why it is a dynamic company able to adapt rapidly to changing market situations.

Nowadays SAGOLA is much more than a manufacturer of spray guns and has become a group of companies also engaged in the manufacture of aeronautic components, components for the bio-medicine sector, passenger transport services and other service businesses.

## Company

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

SAGOLA began 60 years ago as a small subcontracting workshop with three workers. A strong desire to develop our own product and brand led SAGOLA to begin the manufacture of spray painting equipment.

### Development and Innovation

**We have more than 60 years of experience as manufacturer of SPRAY GUNS and spraying equipment**

### Market Observation and Analysis

**SAGOLA specialises in the design and manufacture of coating systems**

**Strengthening our human resources is SAGOLA's principal objective**

**The high level of technology in our production methods guarantees the highest product quality standards**

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

SAGOLA began more than 60 years ago as a small subcontracting workshop with three workers. A strong desire to develop our own product and brand led SAGOLA to begin the manufacture of spray painting equipment.

- > Achieve the best technical conditions in order to offer the highest quality in the finished product,
- > and at the same time present innovation in our most demanding markets, such as the bodyshop and industrial sectors,...

All of this has made SAGOLA what it is today, a company and a brand recognised not only in the domestic market, but in more than 80 countries worldwide.

### Experience

After more than 60 years making and developing new products, we are convinced of the need to establish a close relation with our clients on a day-to-day basis.

We know that the best product is based on the proper development of what is demanded by the market at each moment in time. For that reason we constantly reinforce our training and sales and marketing personnel, which is in permanent contact with the market and its needs all over the world.

The quality of our products is acknowledged in more than eighty countries. SAGOLA has a vast experience and owns know-how in the manufacture of professional coating systems.

### Human Resources

After many years of work SAGOLA can call upon an extensive team of experts who believe in quality and innovation. These two factors are and will continue to be the pillars on which our brand is built.

SAGOLA is a worldwide benchmark brand thanks to the highly qualified professionals in our team. Notwithstanding, this team continues to work towards the objective of consolidating the SAGOLA brand as the industry yardstick.

### Means of Production

The fusion of manufacturing, production means and manufacturing processes technologies with a highly qualified workforce has characterized SAGOLA from the very beginning.

**Qualifications and Commitment**

**Optimisation and Self-improvement**

**Quality as a Trademark**

**R+D+i**

Our commitment to R+D+i is absolutely clear. We devote all our efforts in this department to assuring that our products are adapted to the needs of the market.

Our objective is that between both parties and the innovations generated at our headquarters, clients will regard SAGOLA as a safe bet and stay loyal to a brand which researches on a day-to-day basis to develop products which answer their needs.

**Services**

When it comes to service we are talking about a deeply rooted culture arising from the history of SAGOLA, to which service is vital.

The robotic automation of all our warehouses is an example, a major investment which gives us an advantage over the competition when it comes to offering a fast, reliable response which the market appreciates.

**Quality**

If the SAGOLA brand plays an important role on the market after more than 60 years of history, this is due to the emphasis placed on QUALITY.

At our factory in Vitoria (Spain), each department you visit is steeped in an atmosphere of quality.

At the beginning the founder, Alejandro Sánchez, was able to transmit this vital concept and more than 60 years later his heritage on this point remains as vital as on the first day.

**Warranty**

SAGOLA provides a 3-year guarantee with the main products. We know this is the best way of showing our customers that we believe in our products and that our guarantee will make our past and present customers loyal in the future.

**From its very beginnings SAGOLA has showed marked interest in advances related to care of and respect for the environment**

**The Environment**

Since the very first developments regarding VOC emissions to the atmosphere, SAGOLA wanted to be a cutting-edge company by implementing new environmental regulations and systems for its products.

With the inclusion of EPA and HVLP systems, as well as progress made in the field of filtration and others, we believe that we can contribute on a daily basis through new developments in our innovation policy.

**Sales and Marketing**

We believe that the products we make always need a solid sales support. Our commercial partners all over the world appreciate our assistance in setting up their sales networks and technical teams.

Thanks to the efforts of both, we embark upon each new financial year resting on a solid base suitable for the construction of a long-term project. Courses are available both at our Vitoria headquarters and on site.

**Support for sales networks**

**Our commercial office and training team are amongst the pillars of the SAGOLA BRAND worldwide**

**Training**

Our training team and the entire company believes that there is an important difference between being merely a quality manufacturer and being a manufacturer which develops and trains workgroups for the various sectors in which we are present.

**Customer Service**

This department is aware that our sales effort requires its support when responding to particular dilemmas, problems or needs related to specific queries we are constantly receiving from all over the world. These are transmitted rapidly to qualified experts who provide immediate data and solutions.

**An answer to every need**

**Leading brand**

**We have different product lines specifically adapted to the needs of each sector**

***Bodyshop,**  
we set the pace*

***Industrial Supplies,**  
a traditional benchmark*

The sectors in which we have traditionally had a presence, have always considered us a leading brand, but to stay that way all the players in each sector demand that our developments take account of the changes taking place in each field. We therefore have different product lines for each segment in accordance with its needs.

**Bodyshop**

This is the sector most often identified with SAGOLA, and in many ways the sector which sets the standard for all the others as far as paints and performance are concerned.

Apart from our list of annexes, for this sector we detail our star products in quality and sales volume.

**Industrial Supplies**

This sector recognises in SAGOLA an established manufacturer of coating spray guns and equipment. The brand is closely associated with reliability, quality and convenience at work, contributing confidence to the distribution network and is seen as an industry benchmark, ensuring the best coating results.

Within the industrial range, specific products for wood, metal and maritime applications may be highlighted.

**Decoration and Construction**

This is a constantly developing sector in which SAGOLA has always been the reference, with special finishes for decoration, equipment, for pressure and special pumps for products specifically developed for this sector.

**Hardware and D.I.Y.**

These are sectors which require easy-to-use, price-conscious products with a wide range of solutions covering the needs arising from each market segment. Quality is a major issue in products designed for use by craftsmen or for sporadic use in the case of D.I.Y.

***Hardware and D.I.Y.,**  
solutions for every occasion*

**International Expansion**

Since August 2011, Sagola boasts a new distribution center in Mexico, which is 100% property of Sagola. This distribution center commercialize the whole range of Sagola products in Mexico.

**SAGOLA MEXICO**

The loyalty of our users is one of our closest allies, in conjunction with innovation.

SAGOLA has always been export-oriented and has achieved a notable expansion

Open to markets

Our business partners are aware that SAGOLA, as well as contributing a quality brand, provides them with a manufacturer who has won their loyalty by dint of constant effort over the years. This is something we strive for every day.

We are aware that our development and innovation will be our best allies along with the loyalty of our users in the future.

**Client Portfolio**

We have always had an export-oriented attitude. We are currently present in more than 80 countries and keep on growing to ensure that our brand, and the products it represents, reach the entire world with the invaluable help and support of our importers.

As a reference it is worth noting that SAGOLA was one of the first companies in Spain to obtain ISO certification, which meant a new management model where improvisation was forgotten and gave way to a management organization fully controlled and automated.

Devoted to continuous improvement in quality, service and management

Committed to the Environment

**Approved Manufacturers**

Our relationship with painting manufacturers around the world means that launching SAGOLA in a new market is easier for us.

The commitment to the environment by SAGOLA has always been one of its main objectives. This is the reason why SAGOLA has been a pioneer in the manufacture of equipment for low-emission paint solvent to the atmosphere. We were pioneers in meeting environmental regulations as strict as the 1151 of the US California State SCAQMD.

Our homologations make the market more active because users know that the product they are buying has been tested and homologated by their paint brand.

On the other hand the commitment to uphold the highest standards of security makes the manufacture of our products to evolution continuously in its design and manufacturing process.

For many years, SAGOLA has devoted all its efforts not only on improving the quality of its products and service, but also to improve all aspects related with management, HR, environment, etc.

Therefore our standard products meet CE, ATEX, IP54, etc.

Intellectual property and brand

Trademark in more than 80 countries

More than 60 industrial patents/models registered worldwide CEE / ASIA / USA

SAGOLA is a company which spends significant resources in R&D and is always in constant evolution. As result of this investigation and due to the need of protection of our own Know-how, SAGOLA is very active in all related with the intellectual property, being owner of a large number of patents worldwide.

- Manual Spray Guns
- Automatic Spray Guns
- Packing Nuts
- Blow Guns
- Air Caps
- Valves
- Deposits
- Keys, Accessories

Undoubtedly, SAGOLA is a recognized brand worldwide so in this aspect, the protection levels of our brand worldwide are very high. SAGOLA has got registered its different brands (SAGOLA, DEFYNIK and DELON) practically worldwide.

## Bodyshop Program I

The maximum technological expression in finishing spray guns for bodyshop refinish. The widest range of solutions for the new WATER and HS paints.

Homologations from the main automotive paint manufacturers.

Ease of application in the most demanding processes.  
Metallic, pearls, silvers, high-gloss.

The widest range of answers for all types of professional, from the most demanding bodyshop production performance to the smallest workshop, including bodyshop coatings for industrial vehicles.

Greater reliability in the treatment of the filtrate and heating the air lines in finishes with maximum demand.

What else can you ask from the finish range of spray guns from SAGOLA?

Keep on listening to the painters' requests...

- Extreme finishes**
- Digital precision**
- Perfect waterborne paint uniformity**
- Silvers, pearls**
- The highest gloss in HS clearcoats**
- Economy in paint consumption**
- Easy and smooth handling**
- EPA XTREME and XTREME HVLP systems**
- Maximum product transfer**
- Maximum robustness and minimum maintenance**
- Ergonomics, light and equilibrated PSI/BAR version (consult)**
- Maximum transfer 65 - 75 %**

SAGOLA presents its top technological expression in bodywork finishing spray guns. Smaller, lighter, with optimal weight distribution and more comfortable.

With a new shiny and modern design and most carefully designed ergonomics which offer enviable balance and usability and perfect mechanisation. SAGOLA tackles all present challenges of vehicle refinishing.

With this model SAGOLA offers the widest range of solutions for all the new paints launched by the main paint brands for refinishing.

The New 4600 Xtreme is launched with the highest SAGOLA manufacturing standards, competitive prices whilst maintaining a superb service and offering the best warrantee (3 years). All this with strict compliance with the most demanding standards of manufacture and emissions of solvents, with XTREME and XTREME HVLP systems.

The new **DVR AQUA** and **DVR HVLP** aircaps enhance the application of waterborne products, regardless the level of viscosity. Even distribution of paint through the spray pattern.

**TECHNICAL DETAILS**

- > Weight without cup: (digital): 494 g
- > Weight without cup: (internal reg.): 482 g
- > Weight with cup: (digital): 680 g
- > Weight with cup: (internal reg.): 668 g
- > Dimensions with cup:
  - Digital: 36,5 x 10,6 x 17cm
  - Internal regulator: 33,5 x 10,6 x 17cm
- > Air inlet couplings: 1/4"
- > Cup capacity: 650 ml
- > Cup with removable anti-drip system
- > Incorporates 80-mesh paint filter
- > Maximum recommended inlet pressure (working pressure): 2 bar
- > Maximum recommended application distance:
  - DVR TITANIA, DVR CLEAR, DVR AQUA: 18 - 20 cm
  - LXT HVLP: 12 - 15 cm
- > Average paint output flow (nozzle 1.4 mm. 20"):
  - DVR TITANIA: 233 g/min
  - DVR CLEAR: 227 g/min
  - DVR HVLP: 210 g/min
  - DVR AQUA: 239 g/min
- > Air consumption of each aircap (2 bar inlet):
  - DVR TITANIA: 315 L/min
  - DVR CLEAR: 295 L/min
  - DVR HVLP: 450 L/min
  - DVR AQUA: 280 L/min
- > Fan size:
  - DVR TITANIA: 265-285 mm
  - DVR CLEAR: 285-300 mm
  - DVR HVLP: 280-300 mm
  - DVR AQUA: 295-300 mm
- > Average sound pressure level: 80 dB
- > Materials in contact with the product: anodized aluminium, POM, INOX, Teflon and Nylon
- > Battery type (digital): CR-1/3N Li-Mn 3 V

**DVR TITANIA**  
multipurpose

Lacquers, clearcoats, basecoats

**DVR CLEAR**  
HS

Top performance and gloss with clearcoats and single stage HS paints

**DVR AQUA**  
waterborne

Special waterborne products, easy to apply even at high viscosities

**DVR HVLP**  
colour

Minimum mist, maximum savings and perfect colour matching

- WATERBORNE
- METALLICS
- SILVERS
- PEARL COATINGS

- LACQUERS
- CLEARCOATS
- SINGLE STAGE PAINTS
- MS and HS

The new aircap **DVR CLEAR** together with the innovative nozzle **1.3XL** means a milestone at the ease and speed of application with the new HS clearcoats.

**REGULATIONS / PATENTS / REGISTRIES**

All SAGOLA products comply with the strictest safety standards for the manufacturing of painting equipment. SAGOLA products comply with **EC regulations** and all the **ATEX standards**. To protect itself against copies and counterfeits, SAGOLA register the shape of its guns and, naturally, registers its trademark worldwide.

**4600 Xtreme**

Promotional video  
 Sagola 4600 Xtreme

The most complete range of solutions for the car refinish

Approved by the main paint brands

Compliance with the strictest regulations concerning emissions of solvents

**Tester 4600 HVLP**

Pressure checker for HVLP aircaps.  
 See page 52

Digital version

Standard version  
 (internal regulator)

**DESIGN, FINISH, SHEEN**

The new image of polished forged anodized aluminium recovers the original sheen and colour from sagola bodywork with a modern design.

At the forefront of ergonomics, balanced and comfort when painting.

Light and robust, maintaining the construction in forged aluminium and stainless steel in all its pieces, giving it maximum robustness and minimum maintenance.

Easy and smooth use.

**ECONOMIC CONSUMPTION OF PAINT**

HVLP aircaps with maximum savings and minimum mist.

Xtreme aircaps with maximum performance regarding time and ease of application

**THE WIDEST RANGE OF SOLUTIONS**

Perfect COLOUR MATCHING with basecoats. The highest performance and gloss with clearcoats and HS single stage paints.

2 models: DIGITAL and internal air regulator.

4 aircaps: to fit each need, offering the highest performance and lowest air consumption in their category.

New special nozzle for HS clearcoats, the innovative 1.3 XL.

**RC1**  
**Air Flow Regulation**  
**with Pressure Gauge**  
**Manual Tightening**

Ideal to work with high transfer spray guns HVLP and EPA. Pressure scale red-green as the regulation demands. Made of aluminium. Very light. See page 52

**7 INNOVATIVE ADVANTAGES**

- 1 NEW NOZZLES DV.** Made of stainless steel. High paint flow. Maximum speed of application. 15 - 20% higher product transfer.
- 2 NEW ALUMINUM AIRCAPS for HS and WATERBORNE.** DVR AQUA - DVR CLEAR - DVR HVLP - DVR TITANIA identified with different colors (COLOR SYSTEM). Ultra-fine paint particle size and bigger spray patterns. In the case of the hybrid ones they get higher transfer and greater efficiency, close to the maximum save of HVLP, with better spraying control. Efficient and safe for solvent or waterborne basecoat. Fast with clearcoat.
- 3 NEW AND REVOLUTIONARY AIR DISTRIBUTION SYSTEM.** Carried out at the tip of the air cap, it creates a finer and smoother spray. P 08380132.4
- 4 NEW PROGRESSIVE ACTION VALVE "SOFT FLOW".** Higher precision and smoothness, even with high air pressure.
- 5 NEW PRODUCT REGULATOR DESIGN.** Modern design without sharp edges, it makes easier cleaning. New stainless steel guide box. Built in vernier for precise flow regulation.
- 6 NEW SPRAY FAN REGULATOR DESIGN.** Modern design without sharp edges, it makes easier cleaning. With connection in stainless steel. With less travel and greater precision. Suitable for right and left handed.
- 7 NEW COLOR IDENTIFIER (COLOR CODE).** Perfect for differentiation spray guns when there are multiple painters.
- 8 BODY in highly resistant ANODIZED FORGED ALUMINIUM.** REGISTER DC 3.300.029
- 9 AT THE VANGUARD OF TECHNOLOGY "METAL TO METAL".** The high-end mechanisation technology used makes it the only spray gun in the bodywork market that is manufactured without any kind of gasket, interior or exterior, at the closures between the air and paint. **Minimum number of spare parts.**
- 10 One single piece AUTOMATIC PAINT PACKING GLAND.** Unique in the market. It avoids manipulation and breakage of the glands and makes easier to remove it for a through cleaning of the paint part. P 073000321.5
- 11 ERGONOMIC DESIGN OF THE HANDLE.** Rounder, more ergonomic and comfortable. Enables perfectly balanced movements while painting.
- 12 ERGONOMIC AND COMFORTABLE TRIGGER** New design, reduces fatigue. 100% stainless steel. New screw and saft in stainless steel.
- 13 DIGITAL PRESSURE GAUGE** High-precision pressure readings. Protective ring in stainless steel. Complies with ATEX regulations  $\text{Ex}$  II 2G Ex ia IIC T4 Gb / CE 0163 LOM 05ATEX 2091X.
- 14 HIGH-PRECISION AIR FLOW REGULATOR** Modern design without sharp edges, it makes easier cleaning. Higher regulation precision. Avoids working loose unwittingly.
- 15 Hand tightened AIR FLOW REGULATOR WITH PRESSURE GAUGE.** It does not need any tool to be set or removed. Unique in the market. High precision progressive adjustment. P 200100036

## 3300 GTO Gravity

# 3300 GTO

New body, lighter, maximum ergonomics

EPA and HVLP systems

Time saving. Product saving

Top-range and Low consumption  
 High-end Aluminium aircaps

Compliance with the strictest regulations concerning solvent emissions

HS Primers / Wet-wet

Its new forged body and more ergonomic design together with the highest quality and efficiency nozzles, make a more attractive and versatile spray gun with an excellent value for money offering a wide range of solutions for different painting applications.

SAGOLA renews and improves the mid-high range of spray guns. The new 3300 GTO, is the result of the fusion of two of the most renowned products: 3300 PRO y 4100 GTO.

Perfect atomization with minimum overspray

Masking and sanding time savings

### REGULATIONS / PATENTS / REGISTRATIONS

SAGOLA registers the shapes of its guns and its brand/trademark worldwide, and complies with the strictest safety standards and with the strictest standards on solvent emissions:

- > CE
- > EN 1953
- > ATEX II 2G T60°C X
- > SQMDA 1151 CALIFORNIA
- > SQMDA 1136 CALIFORNIA

## 3300 GTO Gravity

### New Regulators

Air Flow, paint flow and fan control redesigned

### Improved balance

Reworked distribution of material, reinforcing the critical areas

### Nozzle and needle

Made of stainless steel

### Aircaps

Ultra-fine atomization and larger fans. Designed for the best response at any pressure

### Ergonomic trigger

Made of stainless steel  
It reduces fatigue

### Single axis system

Inherited directly from the Xtreme range, simplified design, synchronized operation in any circumstance. Maximum reduction of components and maintenance

### One single piece automatic paint packing gland

It avoids manipulation and breakage of the glands and makes easier to remove it for a thorough cleaning of the paint area

### Body anodized forged aluminium

High quality and resistance

### Anti-corrosive protection

Easier for cleaning and maintenance process

### Couplings for disposable deposits PPS

See page 54

## Mini Xtreme Gravity

# Mini Xtreme

### Spot Repair

Designed for quick repair processes especially with waterborne paints

Ideal for part painting

High quality finishes

Made of forged aluminium

Couplings for disposable deposits PPS  
 See page 54

Control, this is the word that best defines the new SAGOLA Mini Xtreme; why run risks using the wrong tool when it does exist a tool that eases what is difficult?

It always assures the perfect paint-air relation in each situation. It works with the right fan size avoiding the risk of overcharge and inappropriate drop-size.

It reduces mist, saves paint, and perfectly defines the work area.

Light, ergonomic, strong and adapted to the last technologies. Tested and developed on waterborne products.

The fans are designed to obtain the best drying time with the best finish, and always with minimum pressures between 0.5 - 1.0 bar.

### TECHNICAL DETAILS

- > Weight without deposit: 350 g
- > Dimensions with deposit: 26 x 16 x 7 cm
- > Air inlet couplings: 1/4"
- > Standard deposit capacity: 125 ml
- > Incorporates 100-mesh paint filter
- > Design pressure: 8 bar
- > Maximum recommended inlet pressure (working pressure): 2 bar
- > Maximum recommended application distance: 15 - 18 cm
- > Maximum paint flow output (nozzle 1.0, viscosity 16"):
  - Mini AQUA: 102 g/min
  - Mini HVLP: 92 g/min
  - Mini TECH: 116 g/min
- > Air consumption (2 bar inlet):
  - Mini AQUA/EPA: 190 L/min
  - Mini HVLP: 325 L/min
  - Mini TECH: 52 L/min
- > Fan size:
  - Mini AQUA: 235 - 250 mm.
  - Mini HVLP: 170 - 210 mm.
  - Mini TECH: 50 - 60 mm.
- > Average sound pressure level: 81dB
- > Materials in contact with product: anodized aluminium, POM, INOX, Teflón and Nylon.

Code	Version	Application

Drying gun for  
waterborne products

Reduction of drying time

Greater volume of air output  
making possible the fast  
evaporation of water

Exclusive Venturi regulator

Code	Version
10340401	Super Flow

Code	Version
40000243	Venturi classic Stand

**Super Flow** | Drying for  
waterborne products

**Special drying gun for waterborne products.**

Includes venturi regulator to adapt drying technique to the coated surface, retouched area or entire part.

Achieves far superior performance than any other waterborne paints dryer.

Can be fully dismantled to facilitate cleaning and proper maintenance (avoiding pollution).

**TECHNICAL DETAILS**

- > Weight: 580 g
- > 1/4" M Air Inlet
- > Design pressure: 12 bar
- > Working pressure: 3 - 6 bar
- > Sound level: 80 to 83 db
- > Maximum air flow
- > Up to 6,000 litres of air per minute
- > Stainless steel air filter
- > Air consumption: 300 - 600 L/min

Exclusive system of **STRIPPING DOWN** for cleaning  
(in the event of pollution)

**Filters 5000X range**

**SAGOLA**  
**FILTERS**

**Máxima calidad de aire**

**Mínima pérdida de presión en línea**

**Serie 5000X**  
**Desarrollada para las nuevas tecnologías de pintura del automóvil**

The air from a compressor which is circulating throughout the line contains particles and solid impurities, water from the relative humidity of the suctioned air and burnt oil from the compressor.

That's why it is necessary to eliminate these impurities with the help of a filter but taking into account that we always have to obtain the maximum performance with the minimum pressure loss.

With the recent emergence of the new regulations concerning the drastic decrease of solvents in the new primers, basecoats, HS clearcoats and

even in the waterborne paints, the existence of impurities in the compressed air which is used to spray is now more critical for the final results of the bodywork, mainly due to:

- **In HS:** the high gloss of these paints, their poor proportion of solvents and their decrease in the number of finishing coats make that the small particles proceeding from the compressed air become striking.

- **In waterborne paints:** their high incompatibility with any oil and organic fumes makes the air quality requirements very high.

**5300X / 5300X+ / 5200X filters**

Coalescent Filter Regulator  
Purifier Filter (0.01 microns) +  
wide surface active charcoal

Ideal for waterborne and HS paints

Solutions for lines with organic  
fumes in the network

Very high quality finishes

Minimum loss of pressure

Double outlet

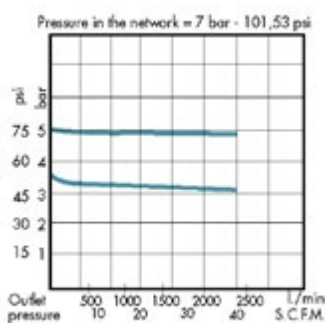

**5300X+**

Model	Code	Version

	10730307	Euro-profile

**5300X**

**5300X**

Model 5300X offers the maximum filtration level in spray booths and painting lines with high quality air demand.

Ideal for waterborne paint and where organic fumes in the network are a problem.

Sinterised brass **8 micron** pre-filtration is incorporated, followed by a **0.01 micron** coalescent filter and final filtration by a **wide surface active charcoal filter**.

In addition to water and impurities, this process eliminates organic fumes and foul air.

**5300X +**

Similar technical and mechanical characteristics than in 5300X.

Ready for an independent use of the Filtration with Active Charcoal.

Double outlet of the Coalescent Filter for the painting and/or blowing.

Simple outlet of the Active Charcoal Filter for the Breathing Equipment or painting.

**5200X**

Model 5200X offers the highest technology for air filtration.

It incorporates an **8 micron** sinterised brass filter, followed by a final **0.01 micron** coalescent filter. Other characteristics are the automatic drain system and the regulator with regulation wheel.

Its **NEW VESSELS** are tougher and more protective. Its **NEW DRAINING SYSTEM** reduces maintenance costs due to its greater durability. It carries out double filtration with optimum flow and pressure regulation, retention of water and impurities attaining an air purity of 99%.

**5200X**

Wide surface filtration elements

Maximum quality of manufacturing processes

Materials and mechanization

Especially designed for waterborne and HS paints

Maximum flow 2,500 L/min

Very smooth working

Maximum precision

Maximum air filtration quality

Quick couplings with mechanisms made of stainless steel

Silicone free joints

**TECHNICAL DETAILS**

**5300X/5200X Models**

- > Air flow: 2,500 L/min
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance 90°C
- > Automatic + semi-automatic drain system (5200X)
- > Automatic + 2 semi-automatic drain systems (5300X)

**BODYSHOP**

**5100X**

Air purifying filters with pressure regulator and assisted regulator wheel.

Its **NEW VESSEL** is tougher and more protective Model 5100X comes with a **NEW DRAIN SYSTEM** which reduces maintenance costs due to its greater durability. Its triple filtration system retains water and impurities. It incorporates an **8 microns** sinterised brass filter.

**5050X**

Model 5050X is an air purifying filter, ideal for the pre-filtration in industrial air lines.

Line Pre-filter for: outlet of medium compressor (inlet 1/2"), level changes in the network, inlet to booths,...

**5000X**

Model	Code	Version
5000X	10730204	US-Mil
	10730207	Nitto
	10730205	Euro-profile

**5000X**

Air purifying system with regulator, with an excellent price/quality ratio. Ideal for booths working with solvent-based paints and preparation areas.

Model 5000X incorporates a semi-automatic drain system and double outlet.

Its **NEW VESSEL** is tougher and more protective.

Based in a triple filtration system which retains water, oil and other impurities.

**TECHNICAL DETAILS**

- > Air flow: 2,500 L/min
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP (USMil connectors)
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance 90°C
- > Semi-automatic drain system (5000X)
- > Automatic drain system (5100X, 5050X)

**Pack 6000X Air Heater**

**PACK**  
**6000X**  
**AIR HEATER**

REDUCTION of drying times

BETTER stretching of clearcoats

SAFE and regular work all the year around

Self-learning function

Overheating protection

Automatic activation by flow switch

Low temperature, there is no need for gloves

In the new **PACK 6000X AIR HEATER** compact design, innovation, electronic high technology and ease of use come together and assure the **temperature stability** both in the compressed air and the final painting elements such as hose and spray gun.

- > Stable painting process in areas with large temperature changes between day and night, winter and summer.
- > Constant working temperature.
- > Compact and robust.
- > Digital temperature display.
- > Cold touch, thermal insulation.

Easy to use; power button and temperature controller. Out of the cabin installation. Lightweight and small; easy to locate.

Right temperature in the spray gun almost immediately.

Temperature electronic control

**It includes a Heated hose**

to get the maximum energy-performance:

- Constant temperature inside the hose, automatically controlled.
- It reduces the minimum working temperature.
- It makes the system independent to the room temperature.
- It reduces the wait time; the working temperature in the spray gun is faster achieved.
- All the advantages from the SAGOLA antistatic hose, now in a heated hose.

1. Digital temperature display: working and real temperatures.
2. Temperature controller.
3. Power button.
4. On/off indication light.
5. Working temperature sensor.
6. Internal heating part.

**Pack 6000X + Heated hose**

- Recommended temperatura chart:
  - > Clearcoats: 40°C to 60°C
  - > Waterborne basecoats: 30°C to 50°C
  - > Solvent based basecoats: 30°C to 40°C
  - > Termopar temperature sensor.
  - > Temperature control device P.I.D.

## Air quality test equipment Complements for filtration system

### Air quality test equipment

Easy to use

High precision

Code

15020001

Equipment for the detection of air impurities, humidity level and temperature.

It incorporates air quality test equipment with inlet regulator, flashlight with magnifying glass of 30 magnification for visualization of impurities, humidity meter and digital temperature.

It incorporates membrane filter kit, pore 0.45 (50 pcs).

Code	Version
49000740	Membrane filter kit, pore 0.45 (50 units)

### COMPLEMENTS for Filters 5000 range

#### INCREASE THE EFFICIENCY OF YOUR SAGOLA FILTER

#### Coalescent filter COUPLING Turn your 5100X into a 5200X

The definitive solution to problems with solid particles. It incorporates a wide surface coalescent filter. Increase of efficiency up to 0.01 microns. Semi-automatic drain system (+ the automatic drain system of 5100X)

Code

56418521

#### Active charcoal filter COUPLING Turn your 5200X into a 5300X

The best solution to problems of contaminating particles and organic fumes in the air network. It incorporates a wide surface active charcoal cartridge. Semi-automatic drain system (+ 2 drains coming with 5200X)

Code

56418520

#### Coalescent filter kit (1 unit)

Optimum service life: 6 months

Code	Model
56418071	5200X, 5300X, 5300X+

#### Active charcoal filter kit (1 unit)

Optimum service life: 3 months

70000006	5200X/5300X

## Bodyshop Program II

The widest range of solutions for all kind of professional, from a high demanding bodyshop to a small workshop and including the painting of industrial vehicles.

Always with the maximum production quality, assuring the best durability even in the hardest environments and offering at the same time the most innovative technologies.

Sagola presents a range of spray guns and equipments for the small workshop and the medium industry.

This is a basic but complete line both for professionals and amateur painters.

**Finishes 3300 GTO CAR**

**SINGLE SHAFT SYSTEM**

Directly Continuing Xtreme model series with a simplified design, synchronized performance in any kind of situation, minimum spare parts and maintenance reduction.

**Highly resistant forged anodized aluminium body**

**Superlight but robust**

**Joined steel to steel technology, without sealing gaskets between components**

**Nozzle + Needle made of stainless steel**

**Light aircaps made of high-end aluminium mechanized CNC**

**Wide and comfortable trigger**

**Maximum spraying**

**Maximum quality and high performance at bodyshop finish**

SAGOLA renews and improves the mid-high range of spray guns for the most demanding bodyshop finishes. Maximum balance between cost and technology. Application of clearcoats, single stages and water-based paints.

Its new forged body and more ergonomic design, coupled with the quality and efficiency of its nozzles (High transfer) make the new **3300 GTO CAR** more attractive and versatile, for maximum brightness and perfect color uniformity in refinish, always with maximum performance.

**GTO HVLP aircaps** with maximum savings and minimum mist. Transfer 75%.

**GTO TECH aircaps** with maximum performance regarding time and ease of application. Transfer 65%.

**REGULATIONS / PATENTS / REGISTRATIONS**

SAGOLA registers the shapes of its guns and its brand/trademark worldwide, and complies with the strictest safety standards and with the strictest standards on solvent emissions:

- > CE
- > EN 1953
- > ATEX  II 2G T60°C X
- > SQMDA 1151 CALIFORNIA
- > SQMDA 1136 CALIFORNIA

**New high-end aluminium aircaps.**

GTO TECH / GTO HVLP

Ultra-fine droplet size and larger fans.

Designed for the best response to any pressure.

With mechanized aerodynamic lugs which eliminate air turbulence.

**It makes top-range paint application easy**

**Paint saving**

**TECHNICAL DETAILS**

- > Weight without deposit: 423 g
- > Dimensions with cup: 34.5 x 10 x 18 cm
- > Air inlet couplings: 1/4"
- > Cup capacity: 650 ml
- > Cup with removable anti-drip system
- > Design pressure: 8 bar
- > Maximum recommended inlet pressure (working pressure): 2 bar
- > Maximum recommended application distance:
  - 3300 TECH: 18 - 20 cm
  - 3300 HVLP: 12 - 15 cm
- > Maximum paint flow output (1.4 mm. nozzle 20"):
  - 3300 TECH: 179 g/min
  - 3300 HVLP: 161 g/min
- > Air consumption (2 bar inlet):
  - 3300 TECH: 290 L/min
  - 3300 HVLP: 360 L/min
- > Fun size:
  - 3300 TECH [1.8]: 290 - 300 mm.
  - 3300 HVLP [1.8]: 290 - 300 mm.
- > Average sound pressure level: 80 dB
- > Materials in contact with product:
  - chromed aluminium, anodized aluminium, POM, INOX and Teflon.

**3300 GTO CAR** Finishes

**3300**  
GTO  
CAR

**Single piece automatic paint packing gland**

Unique in the market. It avoids manipulation and breakage of the glands and makes easier to remove it for a thorough cleaning of the paint part.

**New spray fan regulation design**

Modern design without sharp edges, it makes cleaning easier. With connection in stainless steel. With less travel and greater precision. Suitable for right and left-handed operators.

**Ergonomic trigger**

Made of stainless steel  
It reduces fatigue

**RC2 Air Flow regulator with gauge**

**Small and light**

It maintains the working pressure according to the parameters of Emissions regulations. (Green scale). **Standard in TECH / HVLP bodyshop versions.**  
See page 52

**High-precision air flow regulator**

Modern design without sharp edges, it makes easier the cleaning process. Better regulation precision. It avoids working loose unwittingly.

**Couplings for disposable deposits PPS**  
See page 54

# Classic Pro XD

Maximum ergonomics and comfort

New body design

No joints between air and paint

Internal air distributor

Nozzles and needles in Stainless steel

Chromed Mate

## Classic Pro XD Gravity and Classic Lux Gravity

The best price/quality ratio in conventional primer spray guns.

A new body with improved ergonomics, the widest range of responses and application solutions and complies with the strictest safety standards and with the strictest standards on solvent emissions, distinguish the new model Classic Pro XD.

Single axis system, minimum parts.

One single piece automatic paint packing gland.

No gaskets.

Venturi Classic Stand

**Maximum painting quality**

**Ideal for waterborne and HS paints**

**It holds and automatically drains condensed water and oil**

In order to choose the filter system we shall install in our shop, we must take into account the type of air compressor we have, its condition and the quality of the air it is supplying.

In case we are looking for a high quality filtration of particles, water and oil, for painting in a booth

and to get a good finish, the filter 4120 would be suitable for primers, lacquers, clearcoats and enamels.

To get the highest performance and finishing quality with waterborne paints and High Solid (HS) products, we may need even more pure air that contains no particles at all.

In that case we have to install a coalescent filter and regulator, that is, the 4220. With this filter system we will eliminate any solid particle down to 0.01 microns, water aerosols (C>0.01mg/m<sup>3</sup>) and oil aerosols (C>0.01mg/m<sup>3</sup>).

Centrifugal filtration, separates water and oil through centrifugal force

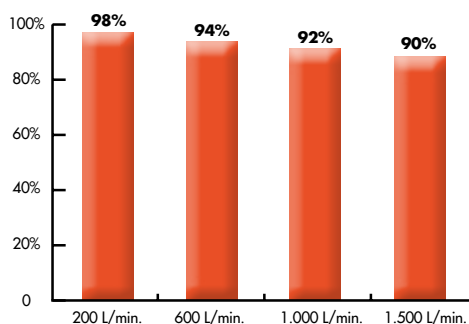

Deposition of water, oil and solid particles

Deposition of remaining particles, > 0.01 microns water and oil.

**Automatic drain system**

**Semi-Automatic drain system**

**Water/Oil purification degree**

**Filters 4000 range**

**Mechanized body from solid aluminum**

No diecast parts inside. High strength elements. Longer durability.

Oversized air holes, bigger air flow and minimum pressure drops.

**Oversized REGULATING WHEEL**

Easy-to-use, even with gloves.

**High quality and easy to read MANOMETER** Double scale: bar and psi.

**ANODIZED to avoid rusting**

Not painted. Anodizing makes it to last longer. Very high resistance to rusting and any other chemical attack.

**Highly resistant ALUMINUM CUP MECHANIZED and ANODIZED.**

Maximum durability. Minimum maintenance.

**Highly accurate REGULATION SYSTEM**

**QUICK COUPLING (PLUS versions)**

**AUTOMATIC draining system.** Automatic purge of condensed liquids without any handling.

**EASY-TO-MAINTAIN.**

No tool required for the disassembly. SAGOLA's exclusive design.

**4120**

**4120 PLUS**

Effective solution for compressed air filtration in professional paint booths

Effective solution for compressed air filtration in professional paint booths for: car refinish, wood, machinery, plastics and industry in general.

Highly reliable air regulation system.  
 Manufactured from a solid aluminum block.  
 It eliminates air, oil and particles.  
 Friction and centrifugal filtration.  
 Automatic drain of condensed liquids.  
 High air flow. High quality manometer.

Model	Code	Version

- 1 **SOLID AND MECHANIZED ALUMINIUM BODY.**  
 No use of melted parts. Sturdy elements.  
 Higher durability. Oversized air paths offering  
 higher flow and minimum pressure drop.
- 2 **ANODISING TREATMENT against oxidation.**  
 No use of protective paints. Infinite durability.  
 Very high resistance to oxidation or any other chemical attack.
- 3 **EASY READING PRESSURE GAUGE.** Double scale PSI/bar gauge.
- 4 **SEMI-AUTOMATIC DRAINING SYSTEMS.** No need of manual draining.
- 5 **OVERSIZED REGULATION HANDLE.**  
 Easy manipulations with gloves.
- 6 **ULTRA-HIGH PRECISION REGULATION SYSTEM.**
- 7 **POLYCARBONATE VESSEL** High-resistance and high  
 transparency. Long-lasting appearance.
- 8 **METALIC SECURITY PROTECTOR.**
- 9 **GENERAL IMPROVEMENT.**  
 Ergonomic improvement. Sturdy build, SAGOLA exclusive image.

## 479 Plus and 970 Plus filters

### 479 PLUS

The most compact solution for the small workshops, industry or priming and preparation areas

Code	Version
10730401	1/2"
10730402	3/8"
10730403	1/4"

Large air flow, maximum reliability regulating system, high quality pressure gauge, the best materials.

Don't undervalue your small painting works or reduce the life of your pneumatic tools by using poor quality regulators and no filtration capacity. Adaptable to any size of hose. It comes with reducers.

Produced from a solid aluminium block, great filtrating capacity with check window for waste particle and semi-automatic drain system, it has everything in a minimum space.

#### TECHNICAL DETAILS

- > Dimensions: 229 x 73 x 115 mm
- > Weight: 886 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar
- > Draining system: semi-automatic

### 970 PLUS

Maximum reliability

Assure the supply of clean air and properly lubricated to tools and pneumatic engines

Code	Version
10750301	1/2"
10750302	3/8"
10750303	1/4"

The virtues of the regulator-filter 479 is now united to a lubricating element, setting itself apart as specific workshop equipment. It supplies clean, lubricated air to all your tools.

Accurate control of the oil content by means of a "drop-by-drop" hand regulator, zero pressure loss thanks to the in-line design, maximum reliability and productivity in the most compact package.

#### TECHNICAL DETAILS

- > Dimensions: 229 x 148 x 115 mm
- > Weight: 1,450 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Connections: 1/2", 3/8", 1/4"
- > Maximum working pressure: 10 bar
- > Draining system: semi-automatic

## 430 Plus, 439 Plus and 437 Plus filters

### 430 PLUS

Small, sturdy, reliable  
and long lasting

Code	Version
10740501	1/2"
10740502	3/8"
10740503	1/4"

Mini air regulator. Mechanized from a solid aluminium block. Diaphragm regulator from 0 to 10 bar. Quality pressure gauge up to 10 bar. Stand included for assembly on the wall. Standard adaptors and fittings included. Quick release and short shift wheel.

#### TECHNICAL DETAILS

- > Dimensions: 107 x 65 x 115 mm
- > Weight: 544 g
- > Air flow: 1,200 - 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar

### 439 PLUS

Made of aluminium  
High-durability  
Maximum robustness

Code	Version
10720401	1/2"
10720402	3/8"
10720403	1/4"

High flow filter for insertion in air lines. Check window for waste liquids. Semi-automatic drain system.

Suitable for all type of installations, accessories included.

#### TECHNICAL DETAILS

- > Dimensions: 158 x 73 x 73 mm
- > Weight: 553 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar
- > Draining system: semi-automatic

### 437 PLUS

Minimum flow restrictions

Code	Version
10710301	1/2"
10710302	3/8"
10710303	1/4"

Ideal for the proper lubrication of pneumatic tools. Multiple inlet and outlet dimensions (1/2", 3/8" and 1/4"). Manual oil regulator by level check window, drop by drop system. CNC mechanized from a solid aluminium block. Made of aluminium, as the whole Plus range.

#### TECHNICAL DETAILS

- > Dimensions: 165 x 73 x 73 mm
- > Weight: 482 g
- > Oil filter
- > Air flow: 1,920 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar

**DM 1/400 and DM 1/300**  
complete equipment

**DM**  
**1/400**

High production

High precision

ATEX II 2G X

**TECHNICAL DETAILS**

- > Pressure ratio: 1 : 1

- > Product output pressure: 7 bar
- > Air inlet pressure: max.: 7 bar
- > Air consumption: 580 L/min
- > Weight: 18 kg

Twin Double Membrane Pump

This is a high production pump which can be used with several spray guns at once.

There is a special version for abrasives.

Clearcoats, dyes, clears, ceramics, basecoats and glues. Basecoats, primers and, in general, medium viscosity products.

Code	Version
30920401	Trolley and absorption
30920402	Trolley and deposit
30920403	Trolley and absorption (abrasives)
30920499	*Full equipment

*\*Complete equipment (standard), includes DM 1/400 (Trolley and absorption), 4100 Xtreme Pressure 1.20 [XT01 B] and 5 m. air and product hoses.*

**DM**  
**1/300**

Medium production

High precision

ATEX II 2G X

**TECHNICAL DETAILS**

- > Pressure ratio 1 : 1
- > Free flow: 30 L/min
- > Air consumption: 380 L/min
- > Product output pressure: max: 6 bar
- > Air inlet pressure: max. 6 bar
- > Air inlet: 1/4"
- > Product outlet: 3/8"

30L Double membrane Pump. Medium production.

For finish and primers.  
High precision product regulator.

Anti-pulsation system and double paint filter.

Lacquers, clearcoats, basecoats, enamels.  
Medium viscosity products.

Code	Version
30920501	Absorption with regulator
30920502	Absorption without regulator
30920503	Deposit with regulator
30920504	Deposit without regulator
30920599	*Full equipment

*\*Complete equipment (standard), includes DM 1/300 (Trolley and absorption with regulator), 4100 Xtreme Pressure 1.20 [XT01 B] and 5 m. air and product hoses.*

## 6110 Inox and 612 pressure pots complete equipment

# 6110 INOX

Easy handling

Robust

Minimum maintenance

Ideal for Bodyshop and  
Marine Industry

Code	Version
10540702	6110 Inox
10540799	*Complete equipment

Stainless Steel pressure pot.

Deposit capacity of 10 liters. Superior product output, double regulation and manual mixer.

Maximum working pressure: 4 bar.

### TECHNICAL DETAILS

- > Pressure ratio 1 : 1
- > Deposit capacity: 10 L
- > Max. working pressure: 4 bar
- > Air inlet: 1/4"
- > Product outlet: 3/8"
- > ATEX  2 II GX

*\*Complete equipment (standard), includes 6110 Inox, 4100 Xtreme Pressure 1.20 [XT01 B] and 5 m. air and product hoses.*

# 612

Easy handling

Robust

Minimum maintenance

Ideal for Industrial Bodyshop

Code	Version
10540801	612
10540899	*Full equipment

Pressure pot. Body and lid in aluminum.

Deposit capacity of 2.5 liters. Superior product output and pressure regulator.

Suitable for waterborne and solvent-based paints.

### TECHNICAL DETAILS

- > Pressure ratio 1 : 1
- > Deposit capacity: 2.5 L
- > Max. working pressure: 4 bar
- > Air inlet: 1/4"
- > Product outlet: 3/8"
- > ATEX  2 II GX

*\*Complete equipment, includes 612 pressure pot, 4100 Xtreme Pressure 1.20 [XT01 B] and 1.8 m. air and product hoses.*

Air + product  
hose Kit. 1.8 m.

## Bodyshop Application Guides, Aircaps, Nozzles and Spray Gun Accessories

Service, a key word in SAGOLA's strategic approach to bodyshop.

One of our main concerns is to make the painter be able to quickly identify and acquire the main SAGOLA original spare parts - nozzles, needles, aircaps, racks, deposits, regulators...

In this section we offer our application guides and our main accessories.

**APPLICATION GUIDE**

**GRAVITY SPRAY GUN  
BODYSHOP**

				2.2 - 2.8				2.5	2.5
				2.0 - 2.5				2.5 - 3.0	2.5 - 3.0

The aircap model is vital to achieve the desired results. The type of product we are going to apply and the application system we are going to use must both be taken into account when selecting an aircap. We will obtain the desired spray by correctly combining the aircap with the correct nozzle and needle kit, and a proper air supply.

### High transfer aircaps

Code	Aircaps	Spray Gun Model	Transfer System	Application	Nozzle+Needle mm.	Air consumption L/min. (2 bar)	Flow g/min.	Max. Fan pattern average mm.

### Air flow regulators

Code  
56418020

Code  
56418012

Code  
40000335

#### Flow regulator with pressure gauge RC1

Aluminium, very light. Ideal for high transfer HVLP and EPA spray guns Red-to-green pressure scale (green within provisions of regulations). Assembled in seconds with hermetic hand tightening.

#### High precision flow regulator

High precision air-flow regulator kit. Solvent-proof gaskets. Suitable for 4600 Xtreme digital. Recommended for finishing spray guns.

#### Flow regulator RC2

Pressure gauge flow regulator. Exact input pressure gun. High quality gauge green scale for high transfer guns.

#### Pressurizer kit for gravity spray guns.

Gravity cup pressure kit for high viscosity materials spraying. Non-return valve included.

#### Tester 4600 HVLP

Pressure checker for HVLP aircaps (mod. 4600 Xtreme spray gun).

Model SP1

Model SP2

Code  
56418513

Code  
10010051

#### Magnetic Stands SP1 and SP2

Magnetic stand for 1 (SP1) or 2 (SP2) spray guns. Solvent-proof paint. Supports PPS type adapters. Maximum robustness. High holding power due to two powerful magnets.

### Accessories for cleaning and maintenance

#### Cleaning kit

Complete cleaning set, including one brush for outside cleaning, and rods of different sizes for all the inner paths of the spray gun. Supplied in a practical show case.

Code  
40000086

#### Ford 4 viscosimeter

Code  
56418001

Code	Model
40000245	SP1
40000246	SP2

#### Lubricant grease

Natural grease, specially made for spray guns and painting equipments moving parts lubrication. High consistency, even under extreme temperatures. Long lasting, it doesn't lose properties over the time. Easy to open 100 ml. can.

Code  
56418589

Compressed air  
complements  
Connection accessories  
General application  
spray guns

Anti-static hoses, connectors, quick couplings, couplings and seals are elements which complement a good tool with safe, quality work for the painter and panel beater.

The weakest link breaks the chain, we are aware of that here in SAGOLA, and no concessions are made in our accessories range. A safe bet for your professional needs.

**BODYSHOP**  
Compressed air  
Compressed air  
complements

**Anti-static hose and  
Hose Spool SA110/115**

**Anti-static  
compressed air hose**

Ideal for painting in the booth  
Light, flexible and manageable  
Twist free

Anti-static EPDM rubber hose with exterior textile reinforcement. Ideal for painting in the booth.

High security crimped ends able to bear the high temperatures of the booth. No need to use flanges, avoiding that they release or cause leaks due to dilation.

**Hose spool  
SA110 and SA115**

Professional spool  
Metal housing,  
Tough and resistant

Ideal to keep panel, beating and sanding zones tidy and free of hoses on the floor.

Code	Version
40000268	SA110 hose spool 10 m
40000269	SA115 hose spool 15 m

**100 m roll of hose**

Multi-use hose  
Meets Regulation 97/23/CE

**TECHNICAL DETAILS**

- > Working temperature: -40°C to +120°C.
- > Working pressure: 20 bar
- > Breaking strain 80 bar
- > Anti-stick exterior
- > Internal diameter 8 mm. Valid for to be used with HVLP high flow guns
- > Meets Regulation 97/23/CE
- > 1/4" H couplings with conical closure and flare fitting for easy assembly of the push connector
- > Conducting pipe < 1 M Ω
- > Max. temperature: 120°C
- > Tough (breaking strain 80 bar)

**TECHNICAL DETAILS**

- > Hose diameters: 8 x 12 mm
- > Hose material: braided PU (Polyurethane)
- > Connection: 1/4" M
- > Working pressure: 15 kg/cm<sup>2</sup>
- > Maximum pressure: 50 kg/cm<sup>2</sup>
- > Metal housing
- > Orientable wall support

Compact with excellent performance and oil resistance.

**TECHNICAL DETAILS**

- > 8 x 15 mm. air hose in 100 metre rolls
- > Thermal cork hose with exterior polyester reinforcement
- > Working pressure: 20 bar
- > Breaking strain 60 bar
- > Working temperature: -15°C to +60°C

Polyurethane hose extensions.  
Highly flexible and torsion resistant.

**TECHNICAL DETAILS**

- > Hose 1/4" M + 5 x 9.5 mm
- > Couplings 1/4" M
- > Sprung terminals
- > 6.5 mm interior diameter

## Quick couplings and connectors

### FEATURES NEW RANGE Couplings and connectors

Max. pressure: 25 bar  
Europerfil max. pressure: 15 bar  
Aluminum plugs max. pressure: 20 bar

The new range of plugs SAGOLA presents cutting-edge design. SAGOLA offers a wide range that gives cover 100% of market requirements. Is incorporated security versions. All steel and aluminum plugs are BSP; Males (BSPT) and females (BSPP).

Plug body made of treated steel and valve made of brass. So a guaranteed life of more than 1,500,000 uses. The new range of plugs SAGOLA incorporates a handle made of composite, which gives a high resistance to both attrition and drag. Attrition resistance tested in more than 48,000 impacts and the equivalent to a crawl 12 km.

1. **SHOOTER** made of composite with a weight reduction and extraordinary durability against impact (48,000 impacts test).
2. **BODY PLUG** made of steel with anticorrosive treatment.
3. **VALVES** Brass valve manufactured, specific to work at high temperatures.
4. **JOINTS** Nitrile Butadiene. Operating temperature range: -20°C +100°C.
5. **PINS** made of tempered high strength steel that guarantees the absence of attrition.
6. **SPRING** made of stainless steel.

### US-Mil range

Air coupling: 1/4" Flow: 68 m³/h. - 1,133 L/min.

The new 3900 Plus pneumatic sealers are a compact, efficient and light solution for everyday needs in any workshop. These pneumatic guns are very useful when it comes to structure assembling, repairs and windshield set-ups, amongst others. There are two versions: the 3900 Plus for sealants in cartridges and the 3900 Plus M for sealants in sausages. Both versions include a trigger with discharge valve, which guarantees a great precision and control. The metallic internal parts assure a long working life. Besides, those parts do not require any manipulation neither any maintenance. Its body is made of high resistance aluminum. The front part on the 3900 Plus is made of non-deformable plastic. The 3900 Plus sealers are a very strong product capable to work for long working hours.

- > 1/4" Air inlet
- > Discharge valve to shut-off the product outlet when releasing the trigger.
- > Working pressure: 4 - 6 bar

**TECHNICAL DETAILS 3900 PLUS - CARTRIDGE**

- > Front part made in plastic.
- > Bead application of sealers and silicone in 300 ml.
- > Weight: 540 g / Length: 250 mm

**TECHNICAL DETAILS 3900 PLUS M - SAUSAGE**

- > Front part made in anodized aluminum.
- > Bead application of sealers and silicone in sausage:  
300 & 400 ml. **3900 PLUS M4**  
600 ml. **3900 PLUS M6**
- > **3900 PLUS M4:** Weight: 560 g / Length: 250 mm  
**3900 PLUS M6:** Weight: 570 g / Length: 320 mm

Code  
10330301

**518 PRO**

Pressurized pneumatic gun for antigraffiti cartridges and underbody protection. Total regulation on product flow and quality of atomization and spray size. Air inflow regulator. Operating pressure. The cartridge container is made in anodized aluminum. It is light and sturdy. Needle regulator to control precisely the texturing. Very accurate depressurizing valve. It is easy to handle even with gloves.

Special air cap for cavity wax, that includes two types of dispensers. (OPTIONAL). Stainless steel silencer.

The 518 Pro works with low pressure and offers the maximum regulation options and productivity.

**TECHNICAL DETAILS**

- > Empty weight: 1,369 g
- > Connection: 1/4" male coupling
- > Air consumption: 160 L/min at 3.5 bar air pressure
- > Working pressure: 2 bar - 4 bar
- > Maximum pressure: 10 bar

Special nozzle (Optional)

**Nozzle Kit + Spray gun adapter**

56418705

## Pneumatic undercoating gun 416, blow guns Classic S1 and Pocket blower

# 416

Code

20330401

Pneumatic gun for antigravel cartridges and underbody protection. Operation by suction. Gun for the application of standardized acoustic insulation 1 L. cartridges. To be screwed directly to the cartridge. Adjustable metallic aircap to control the quantity and texture of the product.

### TECHNICAL DETAILS

- > Empty weight: 520 g
- > Connection: 1/4" male coupling
- > Air consumption: 160 L/min at 3.5 bar air pressure
- > Working pressure: 3 bar - 10 bar
- > Maximum pressure: 10 bar

## Classic S1

Blowgun

Made of aluminum

Light and robust

Code Version

20340601	Metallic aircap
20340604	With extension
20340603	Plastic aircap

Three versions of the blow gun Classic S1:

- Classic S1 with metallic aircap.
- Classic S1 with extension.
- Classic S1 with plastic aircap.

Blowgun with body built in aluminum. Light but robust.

### TECHNICAL DETAILS

- > Plastic/metallic/extension Aircap
- > Weight: 187/190/198 g
- > 1/4" male coupling
- > Air consumption: 240 L/min. at 6 (air inlet pressure)
- > Working pressure: 3 bar - 10 bar
- > Maximum pressure: 10 bar

Classic S1  
Metallic aircap

Classic S1

Plastic aircap

## Classic S1 Venturi

Blowgun made of aluminum

Venturi System

High Air flow

Code

20340605

### TECHNICAL DETAILS

- > Metallic Aircap
- > Weight: 225 g
- > 1/4" male coupling
- > Air consumption: 240 L/min. at 6 (air inlet pressure)
- > Air outlet: 925 L/min. at 6 bar
- > Working pressure: 3 bar - 10 bar
- > Maximum pressure: 10 bar

**X4**  
MULTIPLIED  
AIR FLOW

## Pocket blower

Code

40000336

Pocket clip. Adjustable flow. Quick disconnect connector.

**Classic P1, Classic 414, Sprayer AT30 and Classic I Plus**

# Classic P1

Petrol cleaning gun  
Made of aluminium

Code

20340701

# Classic 414

Pneumatic operation

Code

20330502

# Sprayer AT30

Capacity 1 L

Code

40000490

# Classic I Plus

Code

10310201

## TECHNICAL DETAILS

- > Quick closure 1 L. deposit
- > Metal nozzle
- > Flow regulation
- > 1/4" male coupling
- > Air consumption: 146 L/min. at 6 bar (air inlet pressure)
- > Working pressure: 3 bar - 10 bar
- > Maximum pressure: 10 bar
- > Weight: 770 g

Hand-held gun for sand blasting to stipple or clean parts.

Consumption: approx. 280 L/min.  
Max. recommended working pressure 5 bar.

- 2 product caps:
- > Metallic, 5 mm.
  - > Special high-strength ceramic material: 6 mm.

Blister

A must have for degreasing tasks in the bodyshop and industrial painting fields.

Performing an effective and even distribution of the degreasing fluid over the car surface, or part to be painted.

The perfect choice for cleaning and preparation of surfaces before to be sprayed with any kind of waterborne paints.

Strong, sturdy and practical.  
Capacity: 1L. Metal spraying tip.  
Atomization regulation.

Professional inflating gun - pressure checker.

Manufactured in aluminum.

Maximum robustness and reliability.

## TECHNICAL DETAILS

- > Hose length: 0.5 m
- > Working pressure: 0 - 10 bar
- > Shock-protected pressure gauge
- > Weight: 800 g

## Washers

**A clean spray gun** is a fundamental step to achieve higher quality work and longer useful tool life with the minimum maintenance.

But in workshop, **adequate management and handling of solvents** and cleaning products is also vital.

It is important to keep guns in a **suitable place, clean and vapour-free**, and **correctly manage cleaning products**. Both for solvent and waterborne paints.

For the above reasons we at SAGOLA work hard to offer a professional range of spray gun cleaners:

- > Tough construction.
- > Easy handling.
- > Efficient cleaning.
- > Complying with solvent safety regulations.
- > Incorporating adequate accessories for cleaning and handling residues with waterborne products.

## Drying Systems

Infra-red

Workshop productivity directly affects profitability, and both are directly conditioned by drying times.

To achieve this objective in an easy, efficient and safe way is the underlying premise of the SAGOLA DRYING SYSTEMS product line.

Power regulator, electronic control, proximity sensor, flash times for pre-drying, are only a few of our advantages...

## Waste Management System

Crushers

Why increase waste disposal costs of paint cans, paper and cardboard because you can not reduce their volume?

## Personal Protection

Protective masks for sanding and painting processes, gloves, anti-static painters' overalls... One of SAGOLA's main concerns is to assure optimum, safe working conditions for all.

## Sanding Systems, Workshop Complements and Accessories

Day-to-day tasks in the workshop: **pre-paint sanding, masking, booth maintenance...** common operations which, however, are vital to achieve the desired result.

At SAGOLA we are pleased to contribute with our experience and services to help you achieve this aim.

**BODYSHOP**  
Washers  
Spray Gun  
Washers

**Compact 220 and S 25**

Automatic wash with reused/clean solvent

Pump absorption filter

Minimum maintenance

Robust and easy to use

**This version incorporates:**  
Interior fumes outlet.  
Stainless steel grid conduits.  
Safety valve.

**Pneumatic blowing device**  
to avoid the penetration of solvent into the interior of the gun.

**Code**

40000199

**COMPACT 220**

**Compact machine of small size**, ideal for small paint shops.

Designed to automatically clean spray guns when working with solvent-based paints and clearcoats.

Equipped with dual automatic cleaning system, with reused and clean solvents; and two working modes; manual flush air nozzle to avoid the solvent entering the air inlet or automatic.

Pneumatic blowing device to avoid the penetration of solvent into the interior of the gun.

**TECHNICAL DETAILS**

- > 1,000 x 480 x 550 mm
- > Weight: 50 kg
- > Sustainable load: 20 Kg
- > Capacity of the washing unit: 38 L
- > Working pressure: max. 10 bar
- > Compact, occupies minimum space
- > Automatic wash with reused/ clean solvent
- > Timer
- > Automatic extraction of fumes
- > Made of stainless steel
- > CE certification
- > ATEX  II 3GD

**S25**

**Compact, small size**  
**Automatic highly efficient built-in extraction**

**Capacity for 2 guns, 2 cups and lids**

**100% Stainless Steel**

**Compact machine of small size**, ideal for small paint shops. Designed to automatically clean spray guns and painting accessories when working with solvent-based paints and clearcoats.

Equipped with pump absorption filter and timer for 15 minutes. Easy to use. Maximum robustness. Minimum maintenance.

**Code**

40000521

**TECHNICAL DETAILS**

- > 550 x 500 x 980 mm
- > Weight: 25 Kg
- > Capacity: 2 guns, 2 cups
- > Working max. pressure: 6 bar
- > Compact and small size
- > Pump absorption filter
- > ATEX  II 3GD

## Compact 235 and Aqua Plastic +

Auto-extraction  
of solvent vapors

Atomizer venturi

Blowgun for drying the  
gun interior areas

Brush for washing the  
gun exterior areas

Code

40000522

### COMPACT235

Designed to clean automatically spray guns and painting accessories when working with solvent-based paints and clearcoats.

Recirculation solvent automatic cycle (timer). Automatic final cycle of clean solvent. Equipped with dual automatic cleaning system, with reused and clean solvents, this latter can be dosed in a timed or manual.

Pneumatic blowing device to avoid the penetration of solvent into the interior of the gun.  
100% Stainless Steel.

#### TECHNICAL DETAILS

- > 1,520 x 700 x 530 mm
- > Weight: 50 Kg
- > Sustainable load 20 kg
- > Washing area volume: 38 Litres
- > Working pressure: 10 bar
- > CE certification
- > ATEX  II 3G

Brush with water for cleaning  
the exterior of the gun

Gun with coupling to clean  
interior areas

Blowgun for drying

Filter mat for residues and  
pump absorption filter

Code

40000177

### AQUA PLASTIC<sup>+</sup>

Design to clean spray guns and accessories when working with waterborne products.

Allows to clean easily of the dirty water, mixing it with the flocculant through a pneumatic system. This way it separates completely the paint and pigment residues.

Robust and easy to use. Minimum maintenance.

Made of stainless steel.

#### TECHNICAL DETAILS

- > 1,500 x 500 x 660 mm
- > Weight: 40 Kg
- > Grid 275 x 385 mm
- > Deposit dimensions: 540 x 355 mm. (30 Litres)
- > Max. working unit weight: 5 Kg
- > Pump output 5 L/min
- > Working pressure: 7 - 10 bar
- > CE Certification
- > ATEX  II 3G

Filter mat for  
residues and pump  
absorption filter

## Double 250 and accessories

### DOBLE250

**Atomizer venturi**

**Auto-extraction  
of solvent vapors**

**Brush for washing the  
gun exterior areas**

**Blowgun for drying the  
gun interior areas**

**Gun with coupling to  
clean interior areas**

**Filter mat for residues**

Meets all the advantages of the two most complete machines in the range Sagola: Sagola Aqua Plastic (water) and Sagola Compact 235 (solvent).

Designed with full equipment to offer an integrated solution offering optimum cleaning of guns which work with the new range of paints, waterborne basecoats and clearcoats and HS single stage paints.

Made of stainless steel.

Solvent area: Recirculation solvent automatic cycle (timer). Automatic final cycle of clean solvent. Manual cleaning brush. Final cleaning with clean solvent spraying. Auto-extraction of solvent vapors.

Water area: Allows to clean easily of the dirty water, mixing it with the flocculant through a pneumatic system. This way it separates completely the paint and pigment residues. Blowgun for drying.

**Code**

40000201

#### TECHNICAL DETAILS

- > 1,500 x 1,000 x 660 mm
- > Weight: 90 Kg
- > Sustainable load: 2 guns
- > Solvent area volume: 50 Litres
- > Water area volume: 30 Litres
- > Water/solvent pump flow: 5 L/min
- > Working pressure: 6 - 10 bar
- > CE Certification
- > ATEX II 3G

## Can and carton crusher

### Can Crusher

Simple, versatile and efficient

Code

40000314

#### TECHNICAL DETAILS

- > Dimensions: 510 x 540 x 1,460 mm
- > Working pressure: 8 bar
- > Power: above 1,700 Kg
- > Pneumatic safety system
- > Total weight: 185 Kg

Meets European Directive 98/37/CEE of 22 January 1998.

Significant space saving and cost reduction in waste management.

Designed to solve residue storage and disposal problems in places like bodyshops, industrial workshops, garages, etc.

#### Can Crusher

Greater load. Valid for cylindrical recipients up to 25 L.

### Can and carton crusher

Functional and complete

Code

40000315

#### TECHNICAL DETAILS

- > Dimensions: 560 x 750 x 1,750 mm
- > Working pressure: 8 - 9 bar
- > Pneumatic safety system
- > Total weight: 225 Kg

#### Can and carton crusher

Two accesses:

- > Upper: loads cardboard and paper.
- > Lower: unloads cardboard, loads cans.

Reel of string at rear to tie the crushed bundles of paper and cardboard.

# BODYSHOP

## Trolleys and Racks

Trolleys  
and racks

### Rotating Panel Rack

Rack for bodyshop parts painting and sanding, very stable and fully adaptable.

Parts can be adjusted to the desired angle and height.

Lower tray for accessories.

Wheels with foot-brake for the turning system.

Code

40000251

### Scissor Rack

Manageable and light

Holder for parts under repair or painting with sponge rollers to avoid damage to parts.

Curved legs designed for use on grid floors.

Code

40000250

### Triple Mask

Very robust

Mobile masking paper roll holders with wheels to facilitate transport and laminated cutting edge for easy use.

Includes masking tape dispenser.

Code

40000238

#### TECHNICAL DETAILS

- > Dimensions: 35 cm, 60 cm, 90 cm.
- > Holds up to 3 rolls

**Complete breathing equipment 4240 and Mask MP300**

Complete breathing equipment which includes: belt, pocket regulator and coalescent filter to remove low levels of moisture and oil. 10 meters of hose and safety plugs, 1,5 meter of hose spray gun outlet.

Preset regulator incorporating flow warning gauge with integrated high efficiency coalescent filter. Carbon filter to absorb vapour and odour.

The unit conforms to BS EN 1835, with a protection factor of 40. EC Certificate Number 58459, issued by BSi Product Certification. 89/686/CEE (EPI) approved.

**MP 300**

Mask with double charcoal filter against organic and solvent fumes

Facial housing of thermoplastic rubber

Elastic tape fastener

Double air inlet, allowing higher flow inhalations, making easier to breathe. Antiallergic. The mask is fitted with two carbon filters and a exhaling valve.

Suitable to be used in atmospheres contaminated with fumes and vapours with a boiling point over 65°C, like solvents and paints, offering a proper protection (with oxygen content in the air over 17% in volume).

Each of the built-in chemical filters of the mask is classified as "filter against fumes, A type, class 1" according to EN 141, and are also certificated separately.

Code
14810301

SPARE Paint filter against organic and solvent fumes. 10 units.

## "L" range sanders and 1200X Polisher

The air outlet is spins 360°

The air can be oriented and kept away from the use

Fitted for extraction, it is easily connected to central or portable extraction systems

"L" range sanders have been designed for workshops where high performance and top quality finishes are demanded. If you are looking for scratch-free quality, you can trust the "L" range. Due to the lubricant-free design, there is no concern about substrate contamination. 0.2 HP motor, 12,000 r.p.m.

The **L505** is a pneumatic orbital sander with a 5 mm. oscillation designed for quick grinding down, with a good quality surface finish.

The **L252** is a pneumatic orbital sander with an oscillation of 2.5 mm. which ensures high quality finishes without leaving any kind of marks on the surface.

The **L252R** is a pneumatic orbital sander which ensures precision sanding and top quality finishing. It is ergonomic and light, perfect for those small retouches.
